STEP SHOWCASE

**Edgar County Showcase Property
Step Station**

Edgar County is in the process of working with a local producer in showcasing different CPP Programs and CRP Programs offered through Soil & Water Conservation District, FSA and NRCS. This property will help our area students with preparing for the Envirothon and provide us the ability to show our producers what the outcome should be after the project is completed. Edgar County is very excited about this showcase station and thinks it will be very beneficial to our area. This is a much needed program to inform our producers more on the projects offered.
