SOIL HEALTH WEEK

*The Art and Science of Soil Health
Advocacy in Action Day*

**"The history of every Nation is eventually written
in the way in which it cares for its soil."**

~ President Franklin Roosevelt, 1937

Join agriculturalists and conservationists from across Illinois for a day of advocacy in action as we showcase the art and science of soil health and clean water.

This is a new Soil Health Week, in-person opportunity for soil and water advocates to meet with state legislators in Springfield to advocate for soil and water conservation and network with special guests during the STAR rally in the State Capitol Rotunda.

Attendees are invited to leave their mark on our beautiful depiction of Illinois agriculture using earth-friendly soil paints.

United for Healthy Soil and Clean Water across Illinois.
