Previous Participant Yes _____

No _____

Planting Location _____

- Applications will be taken until January 31, 2025 or until all the available spots are filled which ever comes first. The goal is 40 sites for FY 2025.
- New participants will have priority over previous participants.
- Participants will each receive a mix of 25 RPM potted Oak trees.

Participating SWCD's are responsible for;

- 1. Taking delivery of trees prior to planting, which may include traveling to a distribution location. The Forestry Committee plans to establish three or four distribution sites throughout Illinois to limit travel by SWCD's to no more than one hour.***
- 2. Taking care of the trees until transferred to a local 4-H group for planting.***

SWCD's and Extension share responsibility for;

- 1. Acquiring a suitable planting site. Either partner may choose the site as long as both parties agree. One site per county.***
 - a. The site must be public property large enough to plant 25 trees. The trees are to be planted together as a group to create a Savanna Habitat, at 30 ft a part. This will require about ½ to ¾ of an acre.***
 - b. Public property should be a city or state park, nature area, bike trail, school, etc.***
 - c. Sites must be selected and confirmed when you submit your application. Extension offices should submit applications to Curt Sinclair. SWCD's should submit applications to Dale Shumaker.***
